

Milestone 3

Due Date : 5th June, 11:59 PM

As mentioned in class, milestone 3 will consist of 2 versions :

- [Modulation/Demodulation](#)
- [Channel Coding, Compression](#)

Everyone will be expected to choose and complete any one of the 2 versions. Interested students can complete both versions for extra credit.

Note : Due to unequal difficulty levels of the two versions (we believe that Modulation/Demodulation is slightly simpler), additional credit will be awarded to those who complete Channel Coding, Compression.

Hence, the split would be as follows :

- 20, 40, 40 for the three milestones if you do modulation/demodulation
- 20, 40, 50 if you do channel coding, compression
- 20, 40, 90 if you do both versions of milestone 3

Note that the project accounts for 50% of the total grade.
